

Contents

First Section: Biological Control

- Molecular characterization of different isolates CpGV and their activity against *Cydia molesta* 8
 Kateryna Barkova, Karolin E. Eberle, Johannes A. Jehle
- Identification of physiologically active volatile compounds in dried apple, dried apricot and dried almonds on *Plodia interpunctella* (HÜBNER) (Lepidoptera: Pyralidae) 9
 Agnes F. Ndomo, Christian Ulrichs, Detlef Ulrich, Monika Hilker, Christoph Reichmuth, Suzanne Huyskens-Keil, Matthias Schöller, Cornel Adler
- Turnip rape as a trap crop and natural pesticides – solutions for the pest disease in organic rape seed cropping? 10
 Tobias Ludwig
- Competition and Synergy of Related Baculoviruses 11
 Gianpiero Gueli Alletti, Jörg T. Wennmann, Johannes A. Jehle

Second Section: Breeding Research - Horticultural Crops

- Marker-Assisted Selection (MAS) for Vf-scab resistance in apple (*Malus domestica*) 14
 Erik Szentgyörgyi, Andreas Peil
- An evaluation approach of salt stress tolerance in carrots 15
 Andrea Rode, Thomas Nothnagel, Eike Kampe
- Usage of intraspecific variability of lemon balm *Melissa officinalis*, for the generation of new gene pools for plant breeding 16
 Johannes Kittler, Hans Krüger, Wolfgang Schütze, Ute Kästner, Wolfram Junghanns, Wolf D. Blüthner, Ulrike Lohwasser, Frank Marthe
- Breeding strategies for the development of resistant strawberry cultivars against the pests *Botrytis cinerea* and *Xanthomonas fragariae* 17
 Markus Bestfleisch, Monika Höfer, Klaus Richter, Magda-Viola Hanke, Erik Schulte, Henryk Flachowsky
- Selected apple and strawberry transcription factors and their relevance to fruit development 18
 Giulia V. Miolli, Henryk Flachowsky, Madga-Viola Hanke, Azeddine Si-Ammour
- Generation of cisgenic apple (*Malus x domestica* BORKH.) with a biotic resistance to apple scab caused by *Venturia inaequalis* 19
 Juliane Würdig, Henryk Flachowsky, Magda-Viola Hanke
- Comparative QTL mapping for fire blight resistance 20
 Thomas Wöhner, Isabelle Vogt, Klaus Richter, Magda-Viola Hanke, Cesare Gessler, Giovanni Broggin, Johannes Fahrentrapp, Tania Garcia-Libreros, Andreas Peil, Henryk Flachowsky
- Promoter analysis of pathogen inducible genes of grapevine 21
 Tina Moser, Patrick Merz, Jochen Bogs, Eva Zyprian

Induction of early flowering in poplar and in apple for a speed-up in disease resistance breeding 22
Stephanie Wenzel, Henryk Flachowsky, Magda-Viola Hanke

Localisation and fine-mapping of the downy mildew resistance locus Rpv10 in grapevine 23
Florian Schwander, Rudolf Eibach, Eva Zyprian, Reinhard Töpfer

Third Section: Breeding Research - Agricultural Crops

High resolution mapping of a BaYMV/BaYMV-2 resistance gene located on barley chromosome 5H 26
Katja Perner, Andreas Graner, Frank Ordon

PlantsProFood – new varieties of narrow-leafed lupin for food industry – genetic and molecular analysis of new variability 27
Kristin Fischer, Brigitte Ruge-Wehling, Eicke Rudloff, Anne-Kathrin Klamroth, Peter Wehling

Phenotypic and molecular characterisation of new clubroot resistance genes derived from the primary gene pool of *Brassica napus* 28
Wolfgang Lüders, Stefan Abel, Wolfgang Friedt, Doris Kopahnke, Frank Ordon

Identification of molecular markers associated with QTLs in rye 29
Dörthe Musmann, Matthias Enders, Eike Lornsen, Barbara Kusterer, F. Joachim Fromme, Regine Dieterich, Frank Ordon, Peter Wehling, Bernd Hackauf

Fourth section: Diagnostic and Detection Methods

Resistance and tolerance of potato varieties to *Ditylenchus destructor* 32
Peter Mwaura Mutua, Björn Niere, Stefan Vidal

Resistance against powdery and downy mildew of grapes - Searching for biomarkers in the grape leaf metabolome 33
Maike Elfert, Detlef Ulrich, Christoph Hoffmann, Michael Fischer, Thomas Strumpf

Development of a rapid immuno-based method for simultaneous detection of potato viruses with SPR (Surface Plasmon Resonance) 34
Sabine Nutz, Frank Rabenstein, Thomas Kühne

Fifth Section: Epidemiology and Population Dynamics

Analysis of the formation of submersspores and molecular characterization of different isolates of the entomopathogenic fungi *Metarhizium anisopliae* 36
Stefan Laut, Andreas Leclerque, Dietrich Stephan

Development of the population model of the Western corn rootworm 37
Tim Balschmitter

Approaches to model the dispersal of the Western corn rootworm 38
Silke Krügener, Tim Balschmitter

Sixth Session: Mixed Presentations

Analysis of costs for the use of pesticides in winter wheat and winter oil seed rape based on Network of Reference Farms Plant Protection 2007-2010 Karen Kamrath, Bernd Freier, Nicole Beyer	40
Dispersal dynamics of common voles (<i>Microtus arvalis</i>) at field-refuge-boundaries Angela Leukers, Jens Jacob	41
Economic analysis of plant protection strategies in winter rye based on long-term field trials in Dahnsdorf Jovanka Saltzmann, Hella Kehlenbeck	42
Exposure of non-target species to anticoagulant rodenticides Anke Broll, Alexandra Esther, Detlef Schenke, Jens Jacob	43

Posters

Predation efficiency of ladybird beetles <i>Harmonia axyridis</i> and <i>Coccinella septempunctata</i> on <i>Daktulosphaira vitifoliae</i> Susanne Kögel, Christoph Hoffmann, Jürgen Gross	46
Development of a sensor to monitor the thickness of grapevine berry skin Katja Herzog, Tino Wahl, Rolf Wind, Reinhard Töpfer	47
A new experimental system to study the virus entry into plant growing points Mayada Abdelgalil, Lilya Kopertekh, Joachim Schiemann	48
The role of the <i>avrRpt2EA</i> gene in the host-pathogen interaction <i>Malus × robusta</i> 5 - <i>Erwinia amylovora</i> Isabelle Vogt, Thomas Wöhner, Magda-Viola Hanke, Henryk Flachowsky, Andreas Peil	49
Key factors influencing fate and activity of bacterial inoculants and their effect on the indigenous microbial community in the rhizosphere Susanne Schreiter, Ute Zimmerling, Petra Zocher, Rita Grosch, Kornelia Smalla	50
Towards functional markers for apple aroma - Assessment of allelic diversity in members of the lipoxygenase (LOX) gene family Jörg Vogt, Frank Dunemann	51
Fate and effect of sulfadiazine in bulk soil and in the rhizosphere of maize: a mesocosm study Christoph Kopmann, Sven Jechalke, Ingrid Rosendahl, Joost Grooneweg, Ellen Krögerrecklenfort, Ute Zimmerling, Viola Weichelt, Jan Siemens, Wulf Amelung, Holger Heuer, Kornelia Smalla	52
Bacterial community in artificial soils structured by mineral composition and charcoal responded to phenanthrene Doreen Babin, Guo-Chun Ding, Geertje Pronk, Holger Heuer, Katja Heister, Ingrid Kögel-Knabner, Kornelia Smalla	53
Suppression of <i>Globodera pallida</i> in monoculture cropping of potato Caroline Elizabeth Eberlein, Andreas Westphal	54
Occurrence of plant-parasitic nematodes in cut-flowers of Ethiopia Beira Hailu Meressa, Heinz-Wilhelm Dehne, Johannes Hallmann	55

Approaching the dominant dwarfing gene Ddw1 in rye by comparative genetics Maria Theresia Goldfisch, Peter Wehling, Bernd Hackauf	56
Reproductive potential of <i>Heterodera schachtii</i> on various weeds in fallow periods before sugar beet cultivation Annabell Meinecke, Klaus Ziegler, Klaus Bürcky, Andreas Westphal	57
There's something in the water - Guttation and the risk for honey bee colonies (<i>Apis mellifera</i> L.): a worst case semi-field scenario in maize. Malte Frommberger, Jens Pistorius, Ina Joachimsmeier	58
Influence of temperature on hatch of beet cyst nematodes (<i>Heterodera schachtii</i> and <i>Heterodera betae</i>) Bart Andreas Bert Vandenbossche, Björn Niere, Stefan Vidal	59
The <i>Agrotis</i> baculovirus complex: multiple viruses for multiple pests Jörg T. Wennmann, Gianpiero Gueli Alletti, Wael El-Menofy, Waly Essam, Naglaa Abdallah, Johannes A. Jehle	60
Variation in virus content among individual leaves of susceptible barley infected with <i>Barley dwarf virus</i> Nadine Drechsler, Antje Habekuß, Thomas Thieme, Jörg Schubert	61
