Keynotes

I`m my own expert: Evidence synthesis and decision making <i>Christian Kohl</i>	7
Open Research at the JKI – You make it ps-sible, we make it visible Part 1: Copyright, Open Access and Licenses <i>Anja Hühnlein, Ulrike Stahl</i>	8
BEP - the Barley Epigenome Platform of the Science Campus Halle <i>Klaus Humbeck</i>	9

Session 1: Pests, Viruses and Bacteria

Chemical cues for oviposition site acceptance of grapevine moth <i>Margit Rid, Anna Greif, Christoph Hoffmann, Jürgen Gross</i>	11
Variety-depending susceptibility of cherries to <i>Drosophila suzukii</i> according to fruit firmness and other ripening parameters <i>Sebastian Hemer, Felix Briem, Andrea Hecht, Katja Herzog, Astrid Eben, Heidrun Vogt</i>	12
Landscape-level movements and a molecular approach to analyze the diet of <i>Drosophila suzukii</i> <i>Felix Briem, Karin Staudacher, Christiane Zeisler, Astrid Eben, Michael Traugott, Heidrun Vogt</i>	13
Insights into the Nanovirus-legume-aphid interactions <i>Yahya Z. A. Gaafar, Heiko, Ziebell</i>	14
Novel <i>Cydia pomonella</i> granulovirus isolates break virus resistance in codling moth <i>Jiangbin Fan, Jörg Wennmann, Dun Wang, Johannes A. Jehle</i>	15
Survival of <i>Salmonella</i> in agricultural soil – attack from the underground <i>Jasper Schierstaedt, Sven Jechalke, Rita Grosch, Kornelia Smalla, Adam Schikora</i>	16

Session 2: Breeding and Resistance

Identification of genes for resistance against <i>Pyrenophora teres</i> f. <i>teres</i> and <i>Cochliobolus sativus</i> employing genome wide association studies <i>Fluturë Novakazi, Anna Anisimova, Olga Afanasenko, Doris Kopahnke, Frank Ordon</i>	18
Introducing a herbicide tolerance into the Russian Dandelion by means of genome editing <i>Regina Kölzsch, Katja Thiele, Frank Hartung, Joachim Schiemann</i>	19

Resistances to <i>Erysiphe necator</i> <i>Ren3</i> and <i>Ren9</i> are encoded on chromosome 15 from 'Regent' in close vicinity	20
<i>Daniel Zandler, Pierre Schneider, Reinhard Töpfer, Eva Zyprian</i>	
Breeding of Russian dandelion (<i>Taraxacum koksaghyz</i>) – From the wild type to a new resource for a sustainable rubber production	21
<i>Helge Flüß, Brigitte Ruge-Wehling, Fred Eickmeyer, Peter Wehling</i>	
Genetic dissection of two wild emmer QTLs conferring drought tolerance	22
<i>Mathieu Deblicq, Fatiuha Andrii, Yehoshua Saranga, Tamar Krugman, Assaf Distelfeld, Dragan Perovic, Frank Ordon</i>	
Mapping QTL for resistance to net blotch (<i>Pyrenophora teres</i> f. <i>teres</i>) in a wild barley nested association mapping (NAM) population	23
<i>Thomas Vatter, Doris Kopahnke, Klaus Pillen, Frank Ordon</i>	

Session 3: Pathogens and Nematodes

Apple Replant Disease soil effects on the microbial community: a split-root experiment	25
<i>Alicia Balbín-Suárez, Maik Lucas, Lena Rauch, Doreen Babin, Doris Vetterlein, Kornelia Smalla</i>	
Suppression of infective stages of phytonematodes by associated microbiomes	26
<i>Olivera Topalovic, Johannes Hallmann, Holger Heuer</i>	
Differentiation of field populations of the sugar beet cyst nematode based on a pathogenicity gene	27
<i>Rasha Haj Nuaima, Johannes Roeb, Johannes Hallmann, Matthias Daub, Sandra Fischer, Holger Heuer</i>	
Nematodes contributing to apple replant disease, and as indicators of soil quality	28
<i>Xorla Kanfra, Holger Heuer, Johannes Hallmann</i>	
Ti Host status of different cover crops for <i>Pratylenchus penetrans</i>	29
<i>Betre Estifanos, Bernd Honermeier, Johannes Hallmann, Bruno Moerschbacher</i>	

Session 4: Application technique and Crop production

High precision weed control by a direct injection system	31
<i>Jan-Philip Pohl, Dirk Rautmann, Dieter von Hörsten, Henning Nordmeyer</i>	
Market maturity for sprayer equipped with sensor technology for gap detection?	32
<i>Verena Overbeck, Jonas Huhs, Tanja Pelzer</i>	
Crop Production of the future – possible without a rethinking?	33
<i>Lisa-Marie Urso, Till-Fabian Minßen, Cord-Christian Gaus, Jens Karl Wegener, Dieter von Hörsten</i>	

Session 5: Viticulture

Studies on Flowering Time Control in Grapevine <i>Anna Werner, Iris Ochßner, Ludger Hausmann, Reinhard Töpfer</i>	35
Influence of the pruning system on the fungal community of grapevine (<i>Vitis vinifera</i>) <i>Christian Kraus, Ralf Vögele, Michael Fischer</i>	36
'Riesling Rot' and other grapevine berry color mutants from the German-speaking area <i>Franco Röckel, Ludger Hausmann, Erika Maul, Reinhard Töpfer</i>	37
Effects of plant protection intensity and pruning method on functional arthropod bi-odiversity and the effectiveness of natural pest control in vineyards <i>Theresa Pennington, Martin Felix Wedel, Christoph Hoffmann, Martin Entling</i>	37a

Postersession

Priming of soybean to enhance the plant defense against phytonematodes <i>Shimaa Adss, Ahmed Elhady, Adam Schikora, Holger Heuer</i>	39
Does the interaction of host species and host's substrate affect the olfactory host search of the larval ectoparasitoid <i>Holepyris sylvanidis</i> ? <i>Sarah Awater, Benjamin Fürstenau, Tina Gasch</i>	40
Development of methods for pre-symptomatic detection of grapevine diseases like esca, phytoplasmoses and viruses using hyperspectral sensors <i>Nele Bendel, Anna Kicherer, Hans-Christian Klueck, Andreas Backhaus, Udo Seiffert, Toni Schreiber, Steffen Kecke, Micharl Fischer, Michael Maixner, Reinhard Töpfer</i>	41
Enrichment of IncP-1 plasmid carrying bacteria in the rhizosphere of lettuce and tomato – is there a fitness advantage? <i>Nina Bziuk, Eva Fornefeld, Eman Nur, Kornelia Smalla</i>	42
High resolution mapping of resistance genes against barley mosaic disease and <i>Barley yellow dwarf virus</i> <i>Sandra Färber, Ilona Krämer, Antje Habekuß, Wolfgang Friedt, Frank Ordon</i>	43
High resolution mapping of leaf rust resistance gene derived from barley landrace MBR1012 <i>Leila Fazlikhani, Dragan Perovic, Doris Kopahnke, Frank Ordon</i>	44
PRUNI-REPEL: Utilization of host plant volatiles for controlling the vector of ' <i>Candidatus Phytoplasma prunorum</i> ' <i>Jannicke Gallinger, Jürgen Gross</i>	45
Pre-infected grapevine planting material as a cause of Esca in vineyards? <i>Nicolai Haag, Michael Fischer</i>	46

A transcriptome-based approach for developing breeding lines in <i>Lolium</i> sp. with multiple pathogen resistance <i>Florian Haase, Christof Böhm, Peter Winter, Björn Rotter, Brigitte Ruge-Wehling</i>	47
Establishment of efficient strategies for controlling downy mildew (<i>Peronospora salviae-officinalis</i>) and other pathogenic fungi on common sage (<i>Salvia officinalis</i>) <i>Mascha Hoffmeister, Wolfgang Maier</i>	48
Non-invasive phenotyping methods for abiotic and biotic stress in grapevine breeding <i>Rebecca Höfle, Anna Kicherer, Reinhard Töpfer</i>	49
Identification and mapping of QTL for <i>Zymoseptoria tritici</i> resistance in the winter wheat accession HTRI 1410 <i>Frances Karlstedt, Doris Kopahnke, Dragan Perovic, Frank Ordon, Klaus Pillen</i>	50
Feeding behavior of Green peach aphid (<i>Myzus persicae</i>) on <i>Asparagus</i> spp. susceptible and resistant to <i>Asparagus virus 1</i> <i>Edit Lantos, Edgar Schliephake, Reiner Krämer, Thomas Nothnagel</i>	51
Interspecific hybridization between <i>Asparagus officinalis</i> and <i>Asparagus prostratus</i> to transmit <i>Asparagus virus 1</i> resistance <i>Susann Plath, Reiner Krämer, Holger Budahn, Thomas Nothnagel</i>	52
Comparative studies of bunch architecture in grapevine varieties and 'Pinot Noir' clones <i>Robert Richter, Susanne Rossmann, Reinhard Töpfer, Klaus Theres, Eva Zyprian</i>	53
Automated evaluation and comparison of grapevine genotypes by means of grape cluster architecture <i>Florian Rist, Katja Herzog, Reinhard Töpfer</i>	54
Identification of <i>Wheat dwarf virus</i> (WDV) resistance/tolerance in wheat <i>Britta Ruckwied, Antje Habekuß, Klaus Pillen, Frank Ordon</i>	55
Toward molecular differentiation of common bunt and dwarf bunt fungi <i>Somayyeh Sedaghatjoo, Wolfgang Maier</i>	56
Potential candidates for plant proteins interacting with bacterial quorum sensing (QS) molecules <i>Abhishek Shrestha, Sebastian T. Schenk, Cassandra Hernandez-Reyes, Adam Schikora</i>	57
Improved construction of full-length cDNA clones of <i>Apple chlorotic leaf spot virus</i> and agroinoculation on woody plants by vacuum infiltration <i>Lei Zhang, Wilhelm Jelkmann</i>	58
