

## Supplementary information

Table S1. Nutrient concentrations of maize in a pot experiment at BBCH 32 and 85 in 2016–2021 as affected by type of P-fertilizer (TSP (triple superphosphate), BC (bone char), BC<sup>plus</sup> (sulfur enriched bone char)). Low letters indicate significant differences (standard deviation in brackets; p < 0.05, Kruskal-Wallis test or Tukey test in dependence of normal distribution of data).
