Welcoming address	
G. ALLEWELDT	1
Section 1: Genetic resources, evaluation and screening	
A. CALO, A. COSTACURTA, R. DI STEFANO, G. CALO and G. PALUDETTI : Research on the meaning of the enzymatic systems (GPI and PGM) as parameters for the definition of varieties (<i>Vitis</i> sp.): The Italian case of Cabernet franc	5
P. R. HEMSTAD and J. J. LUBY: Evaluation and utilization of <i>Vitis riparia</i> as a source of genes for extreme cold hardiness	23
A. SCIENZA, R. ANZANI, O. FAILLA, F. MATTIVI, P. L. VILLA, G. TEDESCO, P. G. RIGHETTI, C. ETTORI, S. MAGENES and E. GIANAZZA: <i>Vitis vinifera</i> - a chemotaxonomic approach: Seed storage proteins	24
A. CAMUSSI, A. CALO, A. COSTACURTA, C. LORENZONI and E. OTTAVIANO: A model of discriminant analysis on the basis of descriptor variables for the ampelography of <i>Vitis</i> sp.	29
L. P. TROSHIN, P. N. NEDOV, A. I. LITVAK and N. I. GUZUN: Improvement of <i>Vitis vinifera sativa</i> D. C. taxonomy	37
ERIKA DETTWEILER-MÜNCH: Activities concerning conservation of <i>Vitis</i> germplasm	44
ZHANG FENGQIN, LUO FANGMEI and GU DABIN: Studies on germplasm resources of wild grape species (<i>Vitis</i> spp.) in China	50
DOROTA POSPISILOVA: Evaluation and utilization of vine genetic resources in Czechoslovakia	58
J. ANDRÉ and E. HAJDU: The role of variety as genetic potential in nutrient utilization	62
A. BRONNER and J. OLIVEIRA: Creation and study of the Pinot noir variety lineage	69
S. CANCELLIER, A. CALO and A. COSTACURTA: Genetic improvement for crossbreeding in table grape varieties	81
R. BOTTA, R. VALLANIA, M. L. MIAJA, G. VERGANO, G. ME: Isozyme pattern comparison between tissue-cultured grapevines and mother plants	88
P. VILLA, A. SCIENZA, F. ROMANO and S. STEFINI: Variability of must acidity in self pollinated Chardonnay progeny	93
G. TEDESCO, G. CARGNELLO, E. ZANARDINI, P. VILLA and E. GIANAZZA: Characterization of <i>Vitis vinifera</i> biotypes through biochemical methods	96
R. ANZANI, O. FAILLA, A. SCIENZA and F. CAMPOSTRINI: Wild grapevine (<i>Vitis vinifera</i> var. <i>silvestris</i>) in Italy: Distribution, characteristics and germplasm preservation - 1989 report	97
V. KRAUS: Genealogy of old and creation of new resistance donors	113

G. TEDESCO, G. CARGNELLO, E. ZANARDINI, P. VILLA, F. MANINI and E. GIANAZZA: <i>Vitis vinifera</i> – a chemotaxonomic approach: Pollen wall proteins	114
F. MATTIVI, A. SCIENZA, O. FAILLA, P. VILLA, R. ANZANI, G. TEDESCO, E. GIANAZZA and P. RIGHETTI: <i>Vitis vinifera</i> – a chemotaxonomic approach: Anthocyanins in the skin	119
P. KOZMA, A. H. NAGY and O. JUHASZ: Inheritance of isoenzymes and soluble proteins in grape varieties and F ₁ hybrids	134
J. M. ORTIZ, H. ALTUBE, J. R. LISSARRAGUE and V. SOTÉS: The use of isozymes for characterization of Spanish <i>Vitis</i> cultivars	142
G. DARNÉ: The anthocyanins of grapevine leaves and their taxonomic importance	142

Section 2: Genetic improvement of grapevine form or function

R. BECHER: Plant breeders' rights for vine varieties based on the International Convention for the Protection of New Varieties of Plants	145
GERTRUDE MAYER: Results of cross-breeding	148
R. EIBACH: Investigations about the influence of some physiological and phenological characteristics on quality and their heredity	149
E. H. RUHL, P. R. CLINGELEFFER and G. H. KERRIDGE: Potassium uptake of rootstock varieties and hybrids – implications for wine quality	158
K. H. FISHER, T. FULEKI and A. G. REYNOLDS: The heritability of methyl anthranilate and total volatile esters in <i>Vitis</i> spp. hybrids	159
R. SINGH and B. N. S. MURTHY: Breeding grapes for basal fruitfulness	168
J. V. POSSINGHAM, P. R. CLINGELEFFER and G. H. KERRIDGE: Breeding grapevines for tropical environments	169
C. V. POMMER: Breeding table grapes in Brazil	177
R. WAGNER: Study of phenotypic variation by analysing data gathered together by O.I.V. on new varieties of table grapes	178
O. FAILLA, A. SCIENZA, G. STRINGARI, M. FALCETTI: Potassium partitioning between leaves and clusters: Role of rootstock	187
L. AVRAMOV, D. TADJANOVIC, K. PAVLOVIC, M. JOVANOVIC and N. GASIC: On the new very early table varieties obtained by crossing different varieties of grapevine	197
TODORKA SLAVCHEVA: Investigations on the photosynthetic productivity of some newly selected grapevine varieties	204
LUO FANGMEI and ZHANG FENGQIN: Grape breeding in China	212

Section 3: Resistance/tolerance to pests and diseases

N. I. GUZUN, P. N. NEDOV, V. T. USATOV, I. A. KOSTRIKIN and L. F. MELESHKO: Grape selection for resistance to biotic and abiotic environmental factors	219
--	-----

L. BEREZNAI and L. OLAH: The results of resistance improvement in Eger	222
G. STAUDT and H.-H. KASSEMAYER: Resistance to transmission of grapevine fanleaf virus by <i>Xiphinema index</i> in some <i>Vitis</i> species and hybrids	223
R. RIES: Detection of arabis mosaic virus and grapevine leafroll virus I during the period of vegetation	227
M. A. WALKER and C. P. MEREDITH: The genetics of resistance to grapevine fanleaf virus in <i>Vitis vinifera</i>	228
R. RIES: Detection of grapevine nepoviruses in woody canes	238
Y. KJTAO and J.-P. DOAZAN: Grapevine breeding for resistance to powdery mildew: Bioassay system for evaluation of plant resistance and for characterization of different <i>Uncinula necator</i> strains	239
R. BLAICH, C. HEINTZ, G. HOOS and R. WIND: Phenol and silica incrusts in epidermal cells of <i>Vitis</i> spp. as a general defence mechanism	248
M. P. COUTINHO and A. MARTINS: Recent results in vine improvement regarding its resistance to downy and powdery mildews	249
M. BORGIO, S. CANCELLIER and A. COSTACURTA: Search for genotypes resistant to <i>Plasmopara viticola</i> by crossbreeding	254
L. G. JIMÉNEZ A. and A. INGALLS: <i>Vitis caribaea</i> as a source of resistance to Pierce's disease in breeding grapes for the tropics	262
J. A. MORTENSEN and L. H. STOVER: Best combiners during 40 years of breeding <i>Vitis</i> cultivars resistant to Pierce's disease	271
G. RILLING and H. DÜRING: Effects of European red mite on grapevine cultivars	277
V. T. USATOV, L. K. KIREYEVA, V. A. VOLYNKIN, V. P. KLIMENKO and N. P. OLEINIKOV: Evaluation of interspecific populations of grapevine in breeding for complex resistance to fungal diseases and phylloxera	278
H. BECKER and E. SOPP: Rootstocks with immunity to phylloxera and nematode resistance	294
L. BAVARESCO and M. ZAMBONI: Influence of the rootstock and potassium fertilizer on phytoalexin synthesis in Pinot blanc grown in a calcareous soil	295
J. FÜRI † and E. VISONTAI: Selected hybrids of the wine grape variety Seibel 5279	300
H. BECKER and H. KONRAD: Breeding of botrytis tolerant <i>V. vinifera</i> and interspecific wine varieties	302

Section 4: Resistance/tolerance to abiotic stress factors

L. BAVARESCO: Investigations on some physiological parameters involved in chlorosis occurrence in different grapevine rootstocks and a <i>Vitis vinifera</i> cultivar	305
R. M. POOL, B. I. REISCH, M. J. WELSER: Use of differential thermal analysis to quantify bud cold hardiness of grape selections and clones	318

VIII

HE NING, FANG YAOLAN and LIU SHURONG: Grape breeding for cold resistance in North-east China for 30 years	329
D. ZUNIC, L. AVRAMOV and N. TODOROVIC: Winter frost resistance of grapevine varieties belonging to different ecological and geographical groups	330
P. CINDRIC, N. KORAC: Frost resistance of grapevine cultivars of different origin	340
J. ANDRÉ and E. HAJDU: The effect of fertilizers on different wine grape varieties in model container trials	352
EDIT HAJDU: Climatic resistance in some interspecific wine grape hybrid families	358
H. DÜRING: Stomatal adaptation of grapevine leaves to water stress	366
K. S. POGOSYAN: On the mechanism of vine resistance to low temperatures	370
G. FANIZZA and L. RICCIARDI: Influence of drought stress on shoot, leaf growth, leaf water potential, stomatal resistance in wine grape genotypes (<i>Vitis vinifera</i> L.)	371
A. ERIS and A. SOYLU: Stomatal density in various Turkish grape cultivars	382
A. LANG and H. DÜRING: Weather effects of stalk necrosis in <i>Vitis</i>	390
I. SUYANINOV and A. ALIYEV: Reaction norms of the new grape varieties with complex resistance to environmental conditions	396

Section 5: Tissue and cell culture

M. G. MULLINS: Applications of tissue culture to the genetic improvement of grapevines	399
C. P. MEREDITH, S. M. COLBY, J. A. STAMP, A.M. DANDEKAR and E. B. BANDMAN: Progress toward the production of transgenic grapevines by <i>Agrobacterium</i> -mediated transformation	408
I. GRIBAUDO and A. SCHUBERT: Grapevine root transformation with <i>Agrobacterium rhizogenes</i>	412
B. I. REISCH, M. H. MARTENS and Z. M. CHENG: High frequency regeneration from grapevine petioles: Extension to new genotypes	419
G. REUSTLE and G. ALLEWELDT: Isolation and culture of grapevine protoplasts	423
J. V. POSSINGHAM, N. S. SCOTT, K. G. M. SKENE and T. J. BARIBALT: Transformation of <i>Vitis vinifera</i> by <i>Agrobacterium</i> based vectors	431
P. SPIEGEL-ROY, N. SAHAR and I. BARON: Seedless x seedless grape progeny: Technique, results and perspectives	432
D. W. RAMMING, C. A. LEDBETTER and R. TARAIO: Hybridization of seedless grapes	439
A. BOUQUET, A.-M. CHABBERT, Y. DANGLLOT: <i>In vitro</i> selection for tolerance to magnesium deficiency in grapevine rootstocks	445
M. HARST-LANGENBUCHER and G. ALLEWELDT: Conservation of the genetic resources of <i>Vitis</i>	446
H. ÇELİK and M. BATUR: Meristem culture for clonal micropropagation of grapevines	455

B. ALTMAYER: The use of <i>in vitro</i> apical culture of grapevines to eliminate pathogens (different viruses, <i>Agrobacterium tumefaciens</i>)	463
A. DALLOUL, S. MISIK and L. OLAH: <i>In vitro</i> micropropagation of grape varieties	463
A. BOUQUET, G. BENCHETRIT and Y. DANGLOT: Production of somatic embryos and plantlets in seedless grapevine varieties (<i>Vitis vinifera</i> L.) by anther culture	464
D. HARTL, P. MALES and S. JELASKA: Vegetative multiplication of five Dalmatian autochthonous grape cultivars <i>in vitro</i>	464
G. STAUDT and H.-H. KASSEMAYER: Elimination of virus diseases by <i>in vitro</i> culture	465
V. GUELLEC, C. DAVID, A. PETIT, J. TEMPE and M. BRANCHARD: <i>Agrobacterium</i> -mediated transformation of grapevine (<i>Vitis vinifera</i> L.)	465
M.H. NETZER and M. BRANCHARD: <i>Vitis</i> sp.: Somatic embryos obtained on medium inducing calcareous chlorosis	466
J. KAROGLAN, N. MIROSEVIC and S. JELASKA: Grapevine shoot formation <i>in vitro</i>	466
N. MATSUTA and T. HIRABAYASHI: Embryogenic cell lines from somatic embryos of grape (<i>Vitis vinifera</i> L.)	467
ZI YI CAO, WEI LI, CAI YUE GUO and YU SHU QI: The regeneration of plantlets from culture anthers picked from anther culture derived plants in grape <i>in vitro</i>	467

Section 6: Clonal selection

P. ROSATI, O. SILVESTRONI, C. INTRIERI and G. MURRI: Effects of <i>in vitro</i> gamma irradiation on two grapevine cultivars (<i>Vitis vinifera</i> L.)	471
EDIT HAJDU: Selection advance and environmental variance in clonal selection of the wine grape variety Kövidinka	478
H. BECKER: Application of mutagenesis in important varieties and evaluation of new clones	484
A. MARTINS, L. C. CARNEIRO and R. CASTRO: Progress in mass and clonal selection of grapevine varieties in Portugal	485
H.-H. KASSEMAYER: Serological detection of closterovirus-like particles associated with grapevine leafroll disease – an improvement in clonal selection	489
H. SCHÖFFLING and K. H. FAAS: Wine test results from clones of the varieties Kerner, Müller-Thurgau, Gewürztraminer and Riesling during the development and redevelopment phases	490
H. BECKER: Results of clonal selection with Blauer Frühburgunder (Early Pinot noir) at Geisenheim	499
O. SILVESTRONI, C. INTRIERI, R. CREDI, F. FACCIOLI, B. MARANGONI and G. VESPIGNANI: Clonal variability of several grapevine cultivars (<i>V. vinifera</i> L.) grown in the Emilia-Romagna	500
V. PALENIK, D. POSPISILOVA and A. HAMADEJOVA: Clonal selection of rootstocks by means of determination of hard bast layers	508

M. KLIEWER and P. BOWEN: The influence of clonal variation, pruning severity and cane structure on yield components of three Cabernet Sauvignon clones	512
G. VERSINI, A. RAPP, C. VOLKMAN and A. SCIENZA: Flavour compounds of clones from different grape varieties	513
M. VLACHOS: Evaluation of some clones of the table grape variety Hellas	524
A. SCHNEIDER, F. MANNINI, V. GERBI and G. ZEPPA: Effect of vine vigour of <i>Vitis vinifera</i> cv. Nebbiolo clones on wine acidity and quality	525
L. BEREZNAI, Z. BEREZNAI and L. OLAH: Clonal selection of Cabernet	531
Y. S. AGAOGLU, H. ÇELİK and E. GÖKÇAY: Brief ampelographic characterization of indigenous grapevine cultivars subjected to clonal selection in Turkey	532
L. P. TROSHIN: Selection of highly productive grape variations using methods of multidimensional analysis	538
Final remarks	
G. ALLEWELDT	547
