

## Erratum

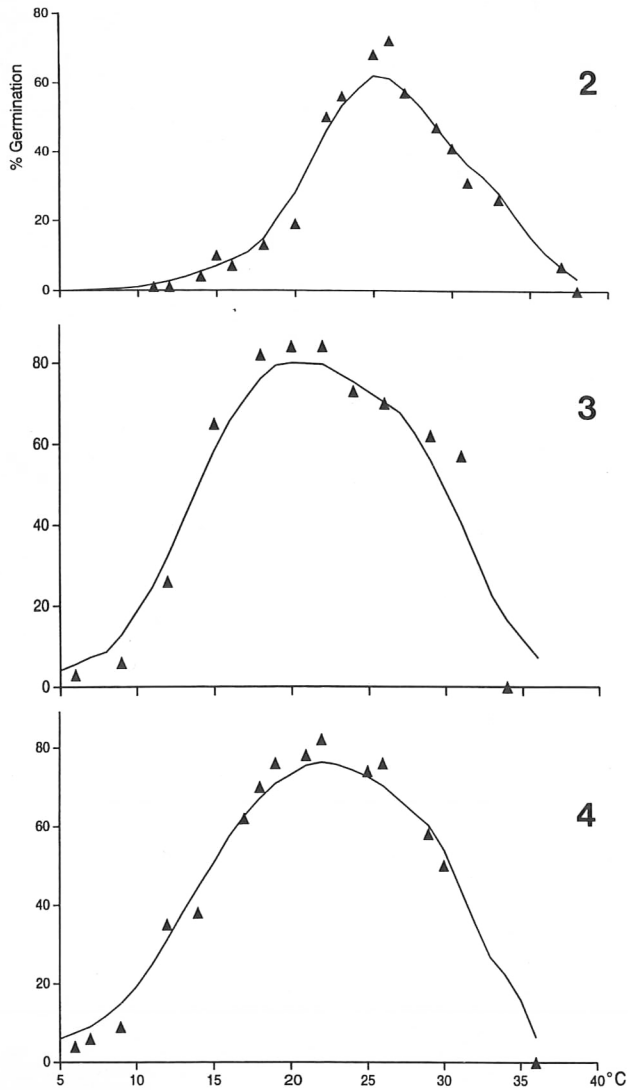

### Research Note

#### The influence of temperature during the development of conidia on the germination of *Uncinula necator*

C. FESSLER and H. H. KASSEMEYER

Vitis **34** (1), 63-64 (1995)

It is regretted that Figures 2-4 were misplaced. The figures are given below in correct order.

Figs. 2-4: The percentage of germination of grape powdery mildew conidia at different temperatures after culturing under a diurnal rhythm with 2: 31/21 °C day/night; 3: 24/14 °C day/night; 4: 18/14 °C day/night.
