

## ACLSV/ApMV

## ASGV/ASPV

For lack of space the ACLSV/ApMV- and ASGV/ASPV blocks are stacked.

● = ApMV/ACLSV or ASGV/ASPV inoculated donor trees, ○ = virus-free recipient trees, ⊙ = virus-positive recipient tree.

The virus and the month of the first detection are given in boxes.

<sup>a</sup> The exposure time for this virus may have been shorter due to a re-inoculation of the adjacent donor tree (see Table 3).
